- E. INFORMATION:

The target consists of a medium vessel that is on water; however there is land nearby. This vessel is white on the top and gray, brown, tan or black on the bottom. A flapping sound is associated with this vessel. Masts may be on this vessel. Smaller boats surround this vessel. Some of the smaller boats look like canoes and some look like dinghies. There are men are the smaller boats rowing up to this large vessel. Then an off-loading occurs from the big vessel to the smaller vessels. Many people are involved in this activity. Contraband is involved.

The vessel and water were only part of the activity. Much work goes on here concerning the contraband on land and air. There was either a helicopter or airplane involved with the activity. This flying object at one point flew very close over the vessel. I felt that I was in a warm climate and many dark skinned

people live and work here. There are some parts of the area where poverty exists.

As for location, at one point I could see a large structure that looked like a building that was sitting in water? Also, I had a feeling that the waters are conducive for whales or sharks.

At one point I could see gold coins in a big bag. The meaning at this point is unknown. Can address at a later date.
